challenges of parking**

# PARKING SOLUTIONS FOR HIGH DENSITY REQUIREMENTS

Keev is proud to present the futuristic Parking Towers and Shuttle systems with high end advanced technology.

We have professionals with highest experience in the industry to handle complex algorithm of Shuttle system with multiple shuttles and turntables to offer swift movement and reliable operation.

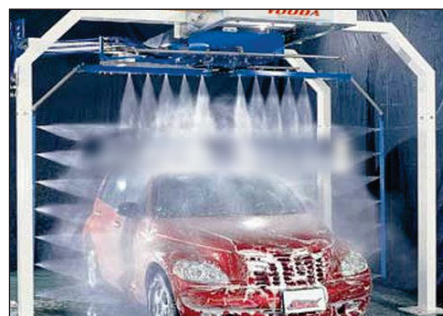

Be ready to pamper your project with these special features and offer extra mile advantages to your deserving end users.

## Safety features:

1. Sensors : Multiple sensors are deployed to recheck the car size with respect to the parking area size, prior to parking.
2. Positional locking system is deployed to ensure pallet is locked in position till the traversing is complete, while parking and retrieval of cars at all levels. This would ensure safe parking of the vehicles.
3. Specially designed safety lock in the tower, to ensure lifter stopping immediately in case of overspeeding of lifter.
4. Protection against Motor overheat and Brake gaps exceeding the threshold limits.

## Special feature:

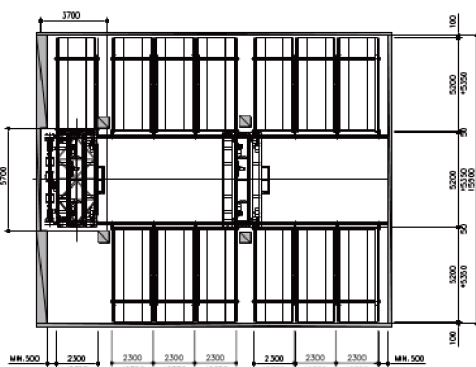

5. Auto Car Washing system within Parking Tower & Shuttle System will enhance customer convenience
6. EV car charging within the Car Parking Tower & Shuttle System to encourage green concept among users.
7. Remote monitoring of critical aspects of system, thereby reducing the down time of system incase of any breakdown.
8. ARROW Parking systems : Offering Destination oriented parking systems incase of multiple parking towers in the same projects. This will enhance parking comfort & reduce total parking time.
9. Pre booking of car retrieval before departure, for your Premium VIP clients. This will reduce waiting time towards car retrieval.
10. Deploying Modular subsystems:
  - Will enable part up gradation, if required to be done, in future.
  - Will help in faster identification of cause of breakdown and resolving the same, if the breakdown arise.
11. Most efficient design offering maximum car space within given space.
12. Turntable : To ease car retrieval and parking. Multiple turntables can be offered in the shuttle system to increase the parking system efficiency.
